A commitment to **ENERGY-EFFICIENT** window fashions.

In 1985 Hunter Douglas introduced Duette®, the original honeycomb shade. It was a breakthrough in energy efficiency. And every Duette shade innovation since delivers an even higher level of performance.

In 2007, our focus on continuous improvement resulted in the creation of Duette Architella®—a beautiful window covering, which also provides a superb investment and can save even more energy in your home, in any climate, during every season.

**OUR LATEST INNOVATIONS**

**Architella Trielle™ Fabric**

The next evolution in window coverings, Architella Trielle™ fabric further elevates energy efficiency in any home. Its patented, triple-honeycomb design offers six layers of fabric and five insulating air pockets, providing unrivaled energy efficiency in a window covering.
